1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 6, 8, 9, 12, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Foye. Foye discloses the claimed invention, including a container support

30. The container support 30 is considered to be configured to support beverage containers having different vertical heights and different cross-sectional area sizes. The support can hold a beverage container that is of the same size and shape as the support, or it can clearly hold a beverage container that is smaller in cross-section and taller in height, thus meeting the claimed limitation.

3. Claims 3-5, 7, 10, 11, and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 15-23 are allowed.

5. Applicant's arguments filed March 30, 2004 have been fully considered but they are not persuasive. Applicant's remarks are believed to be answered by the above rejection.
